PROFESSIONAL SUMMARY

Senior Software Developer with 5+ years of experience designing and building scalable enterprise web and mobile applications using **React.js, Next.js, TypeScript, Node.js, and React Native**. Proven expertise in high-performance frontend architecture across FinTech, Healthcare, and E-commerce domains. Experienced in delivering reusable UI components, secure authentication (OAuth2/JWT/Auth0), dynamic workflows (loan origination, OCR/KYC), state management, and performance optimization. Proficient in integrating AI-assisted tools (Cursor IDE, GitHub Copilot, Claude AI) with custom context rules to accelerate feature implementation and elevate code quality.

CORE EXPERTISE & SKILLS

Frontend:	React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), React Native, Angular, Redux Toolkit, TanStack Query, React Hook Form, Zod, HTML5, CSS3, SCSS, Tailwind CSS, Material UI, Bootstrap, i18n
Backend & DB:	Node.js, Express.js, REST APIs, GraphQL, JWT Authentication, Auth0, OAuth2, Backend for Frontend (BFF), Socket.IO, PostgreSQL, MongoDB, MySQL, Redis
DevOps & Testing:	Azure DevOps, AWS, Docker, Kubernetes, CI/CD, GitHub Actions, Jest, React Testing Library, Cypress, Playwright
AI & Dev Tools:	GitHub Copilot, Claude AI, Cursor IDE (Cursor Rules & Context Engineering), Git, Postman, Figma, Jira

PROFESSIONAL EXPERIENCE

Senior Software Developer — Programming.com (Client: Appinventiv)

December 2025 – Present | Gurugram, India

Tech Stack: React.js, Next.js, TypeScript, Redux Toolkit, Node.js, Express.js, React Hook Form, Zod, Tailwind CSS, Azure DevOps, Cursor IDE, GitHub Copilot

- Engineered enterprise-grade web applications for financial and healthcare clients using React.js, Next.js, TypeScript, and Node.js.
- Designed and implemented reusable, scalable UI components adhering to component-driven architecture to eliminate code duplication.
- Architected dynamic multi-step forms, OCR/KYC document verification, role-based access control, and multilingual (i18n) interfaces.
- Integrated REST APIs and Backend-for-Frontend (BFF) layers while accelerating delivery velocity using AI tools (Cursor IDE, Claude AI, Copilot).
- Optimized application speed and Core Web Vitals using lazy loading, memoization, code splitting, and asset optimization.

- **Sammaan Capital (Enterprise Loan Origination Platform)**
  - Developed customer onboarding and loan processing workflows using React Hook Form and Zod for complex validation rules.
  - Integrated OCR-based KYC verification with client-side image compression and asynchronous document processing.
  - Built role-based administrative dashboards for lead allocation, workflow tracking, and application lifecycle management.

- **Ponteo (Enterprise Healthcare Platform)**
  - Built scalable healthcare workflows, responsive UI modules, and optimized frontend API communication protocols.

Senior Software Developer — OneDAO

June 2024 – August 2025 | Gurugram, India

Tech Stack: React.js, Next.js, React Native, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, Auth0, OAuth2, JWT, Docker, Redis

- Architected a full-stack fundraising platform enabling startups to connect with investors across web and React Native mobile apps.

- Implemented robust identity management using Auth0, JWT, and Google OAuth for secure single sign-on and role-based permissions.
- Designed PostgreSQL relational database schemas and RESTful microservices in Node.js, improving backend API speed by ~30%.
- Configured Azure DevOps CI/CD pipelines to automate multi-environment deployments and release workflows.
- Mentored junior developers through technical code reviews, interviewed candidate developers, and enforced coding standards.

Senior Software Developer — **Accenture (Client: Verizon)** May 2020 – May 2023 | Gurugram, India

Tech Stack: Angular, React Native, JavaScript, TypeScript, Node.js, Express.js, REST APIs, Microservices, AWS, Azure DevOps

- Developed and supported Verizon's high-traffic e-commerce platform modules including product catalog, checkout, and order management.
- Built cross-platform web and mobile interfaces using Angular and React Native, consuming REST APIs within microservices architecture.
- Wrote automated unit tests, optimized rendering pipelines, resolved critical production bugs, and automated releases via CI/CD.

Program Ready Trainer II — **Concentrix** June 2016 – May 2020 | Gurugram, India

- Delivered technical training and troubleshooting operational support for AT&T broadband services, achieving 90%+ CSAT scores.

EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA) — Lovely Professional University 2024 – 2026

Bachelor of Arts (English Honours) — University of Delhi 2014 – 2018

Full Stack Web Development Bootcamp Certification — upGrad
